

Property Consultancy Case Study

Gert Corfield
Director

“The functionalities of Propman that are most beneficial to our surveyors include the ease of navigation around the database and its flexibility in running reports. Similarly, our property accountant finds the ability to customise financial reports to meet clients’ needs very useful along with the standard reporting that Propman provides”

PROPERTY CONSULTANCY

Harris Lamb Property Consultancy

Harris Lamb is an independently owned firm of chartered surveyors/planners based in Birmingham, Worcester and Stoke-on-Trent. With three offices, eight directors and a team of 28 surveyors and planners the company is one of the biggest independent property companies in the region. Harris Lamb offers clients a one stop solution for all commercial property matters including Commercial and Industrial Agency, Property Management, Planning Consultancy, Building Surveying, Project Management, Corporate Support, Professional Services and Investment.

Harris Lamb was established in 1992. As a part of our rapid growth in the property department, it was necessary to use Propman, a professional property management and accounting package, to enable our business to grow.

The functionalities of Propman that are most beneficial to our surveyors include the ease of navigation around the database and its flexibility in running reports. Similarly, our property accountant finds the ability to customise financial reports to meet clients’ needs very useful along with the standard reporting that Propman provides.

Propman is very logical to input data and transactions which ensures efficient and accurate workflow.

“The implementation of Propman was very straight forward and cost effective”

“Propman has made an important difference in allowing our Property Management department to grow quickly and efficiently as well as impressing clients with the quality of reporting which is crucial in the current climate where excellent service is vital”

The implementation of Propman was very straightforward and cost effective. We were able to develop personal relationships with the training and support team which means you are dealing with people who understand your business requirements, making resolutions of queries very efficient. We regularly receive Propman updates of the software and are kept up to date with the latest developments which you can choose to implement or not based on your business requirements.

The main factors that differentiated Propman from competing software packages included the price and the support and training. The functionality of Propman ensures a good balance between meeting the needs of the surveyor and the property accountant.

Propman has made an important difference in allowing our Property Management department to grow quickly and efficiently as well as impressing clients with the quality of reporting which is crucial in the current climate where excellent service is vital.
